

IPSD – SAP INTEGRATED PRODUCT SUPPORT FOR DEFENSE BY ESG

The connection between ILS/IPS and the SAP world

THE DAY-TO-DAY CHALLENGES OF WORKING WITH MILITARY MASTER DATA AND LOGISTICS DATA ...

- » Do you have a lot of master data for your existing systems in different data formats (ASD and non-ASD, e.g. Excel)?
- » Do you receive master data for your weapon systems in different formats, issues and quality? And does it require a lot of manual effort to check the data quality?
- » Do you maintain your master data in your ERP system with a great deal of manual effort?
- » Do you want to automatically check your master data for quality/consistency in accordance with the ASD-S-Series specifications?
- » Do you want to export your master data in a uniform format or transfer it automatically to SAP?
- » Do you want to have all your master data stored in one place without any gaps and manage it there?
- » Are you an N-CORE user and want to automatically generate your codification requests?

If one or more of these challenges apply to you, then we have the solution.

Improve data quality, automate processes and reduce your manual workload with IPSD – SAP Integrated Product Support for Defense by ESG!

HIGH DATA QUALITY WITH MINIMAL MANUAL EFFORT

IPSD – SAP Integrated Product Support for Defense by ESG

IPSD is a content management system for armed forces to import and maintain the master data of complex military systems e.g. in SAP.

AUTOMATED

- » Import and export of master data (spare parts, LSA data sets, technical documentation)
- » Quality checks by the integrated IPSD Rule Engine
- » Generation of change requests for SAP MDG to create or update master records
- » Creation of codification requests in N-CORE

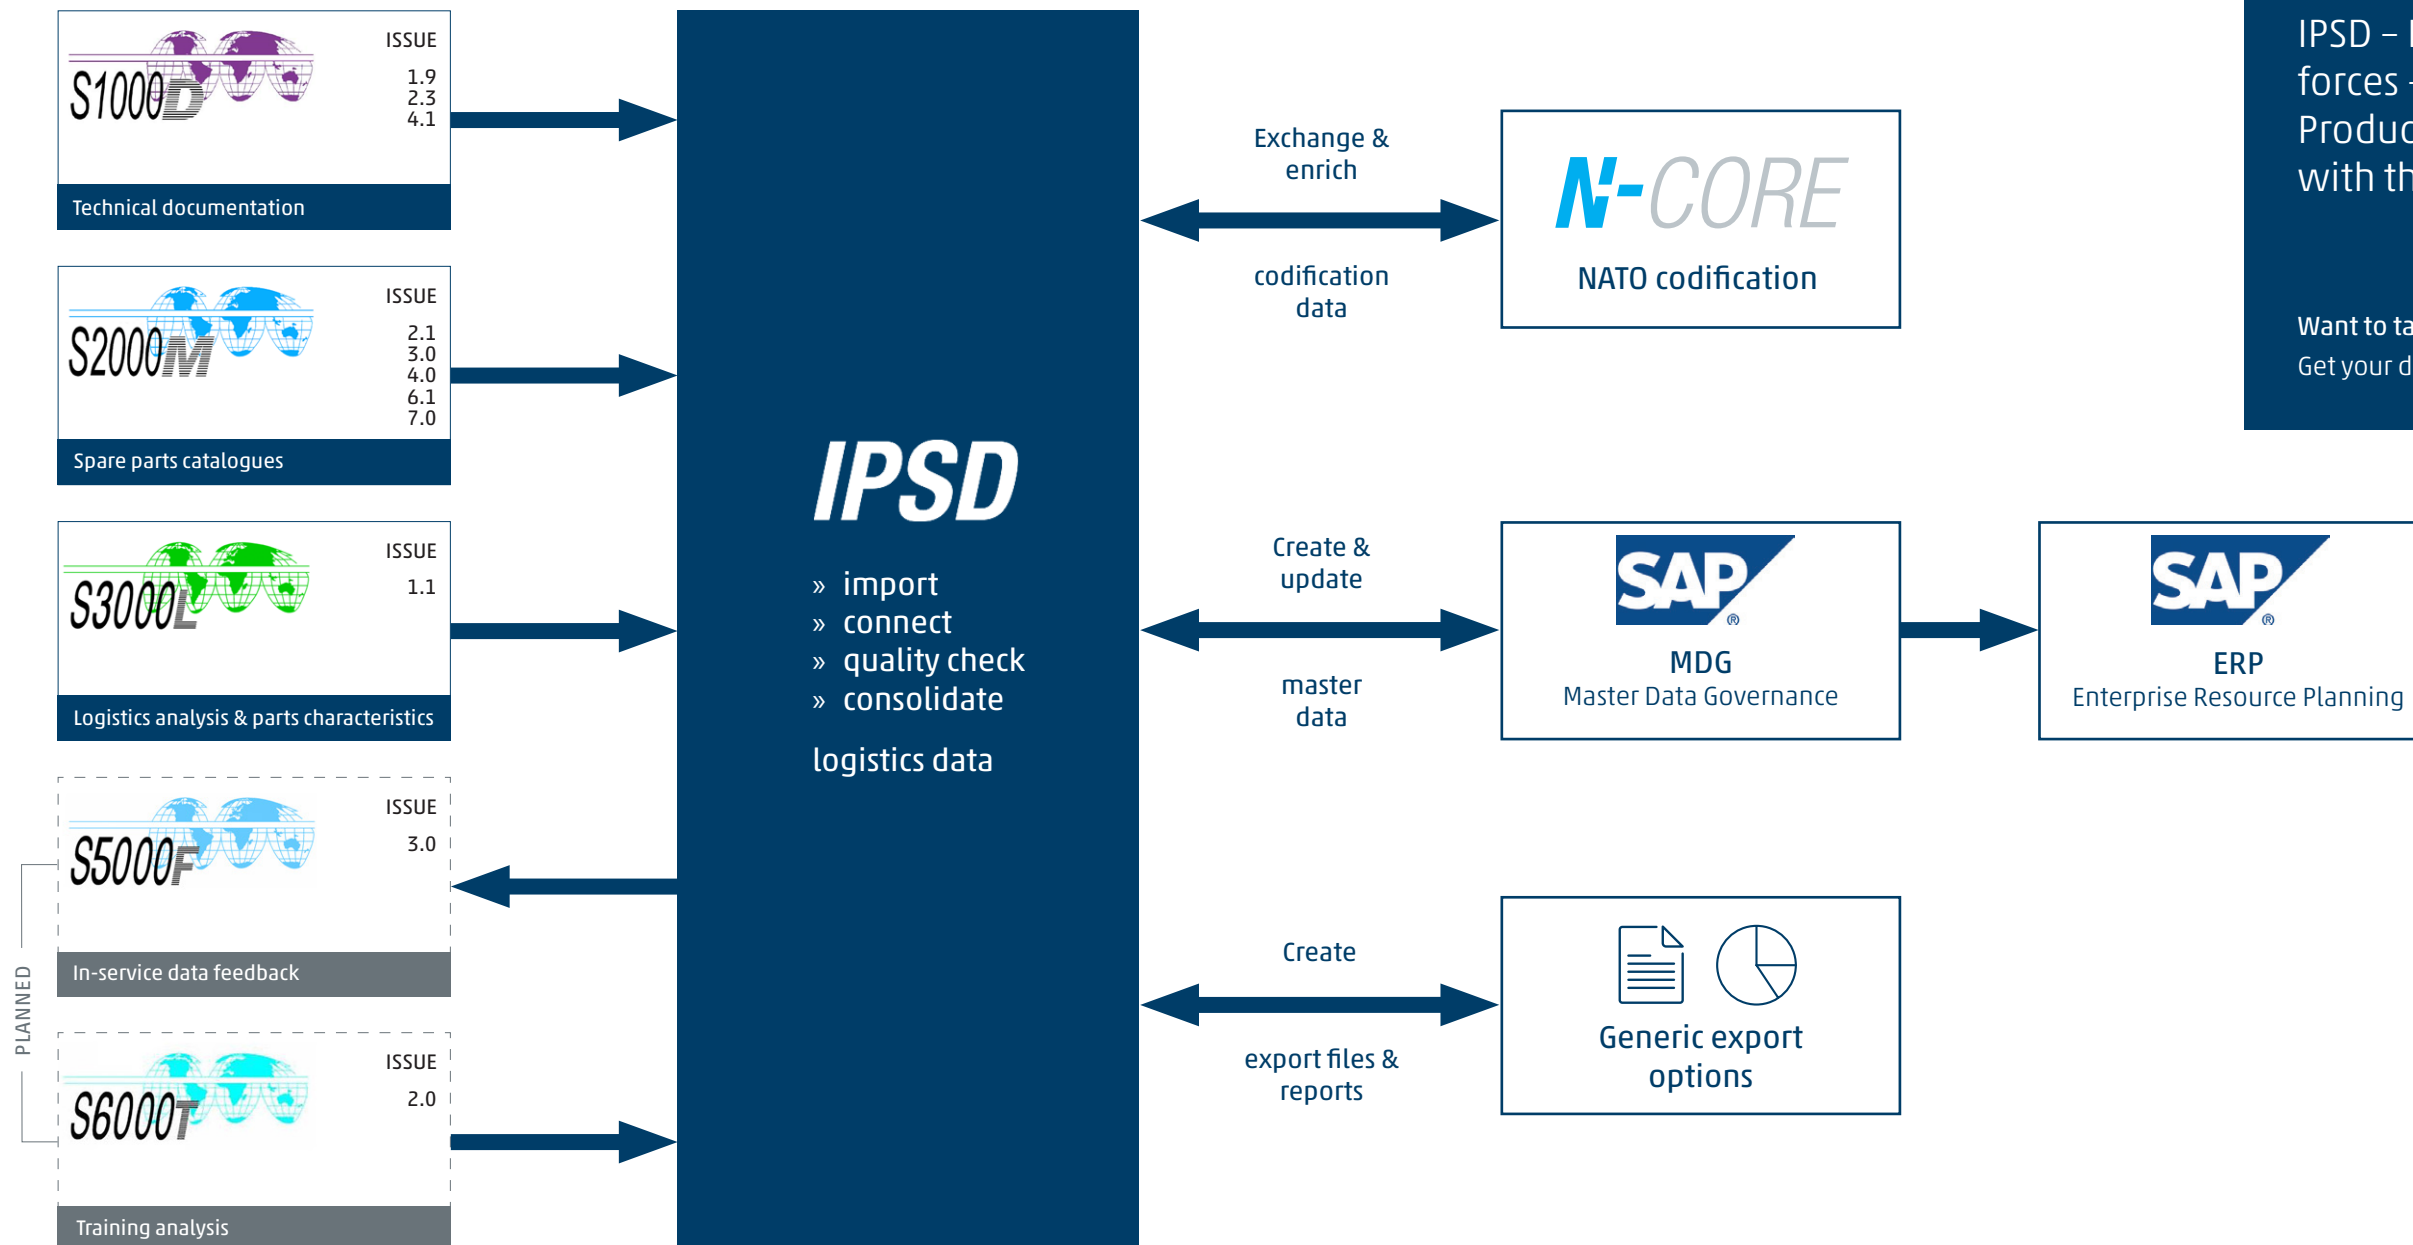

FLEXIBLE

- » Customisable adapter structure for import and export of master data
- » Customisable generation of reports / analyses by the integrated IPSD Report Engine
- » Not limited to ASD data formats
- » Stand-alone solution without SAP system connection is also available

USER-FRIENDLY

- » Simple and intuitive handling
- » Complete history of data changes of the weapon systems stored in a cross-specification database
- » Data enrichment with information from external systems e.g. N-CORE

IPSD – ESG's solution for armed forces – connects ASD Integrated Product Support specifications with the SAP world

OUR SERVICES

IPSD is deployed on premise. We set up, configure and customise your IPSD solution by

- » analysing your processes
- » planning and supporting implementation
- » training users
- » providing quality rules in the form of rulesets for data quality checks
- » customising adapters for importing and exporting your master data
- » customising reports for performing analyses
- » providing maintenance support during the operational phase

ESG – YOUR EXPERT FOR LOGISTIC SOLUTIONS

ESG has provided logistic services and solutions for armed forces and the defence industry for many decades. Our range of logistic tools includes N-CORE – the leading solution for NATO codification worldwide – and solutions for interactive electronic technical documentation.
